Hemostasis Innovation is Here.

HEMOHUB
INTELLIGENT DATA MANAGER

Centralized management for Hemostasis testing

werfen

Support laboratory decision-making

from any PC or tablet via secure network connection

“HemoHub Intelligent Data Manager is simple, intuitive, and modern—and was quickly adopted by the lab staff.”

— Dr. Inès Harzallah, Pharmacist Biologist, Head of Hemostasis Laboratory, Group of Mulhouse and the South Alsace Region (GHRMSA), Mulhouse, France

Make the connection with **HemoHub Intelligent Data Manager**. Enabling centralized information management, HemoHub connects across all Werfen Hemostasis testing systems, enhancing testing efficiency, streamlining workflows, and, ultimately, improving patient care.

Connectivity—standardize and optimize Hemostasis testing across systems and networks, for flexibility and efficiency, while supporting network strength and security

Quality control (QC) management—elevate quality management with comprehensive features, including Compare Analyzer QC and Compare Internal QC, and with AccuTrak 2.0™* peer-comparison review

Lab-decision support—access key insights, metrics, and key performance indicators (KPIs); flexible and robust rules support customer-defined and flexible-rules capabilities, performance tracking, and standardized processes

Management of HemoCell® Specialized Lab Automation—optimize workflows and improve diagnostic outcomes through centralized management

*AccuTrak2.0 is a peer-comparison portal. Users can easily download the QC files from HemoHub and upload them to AccuTrak 2.0.

Connectivity

Standardize Hemostasis testing across an entire network, for greater flexibility and efficiency

Displays status of all connected instruments from a single dashboard

Enables monitoring of results, in real time, for entire network

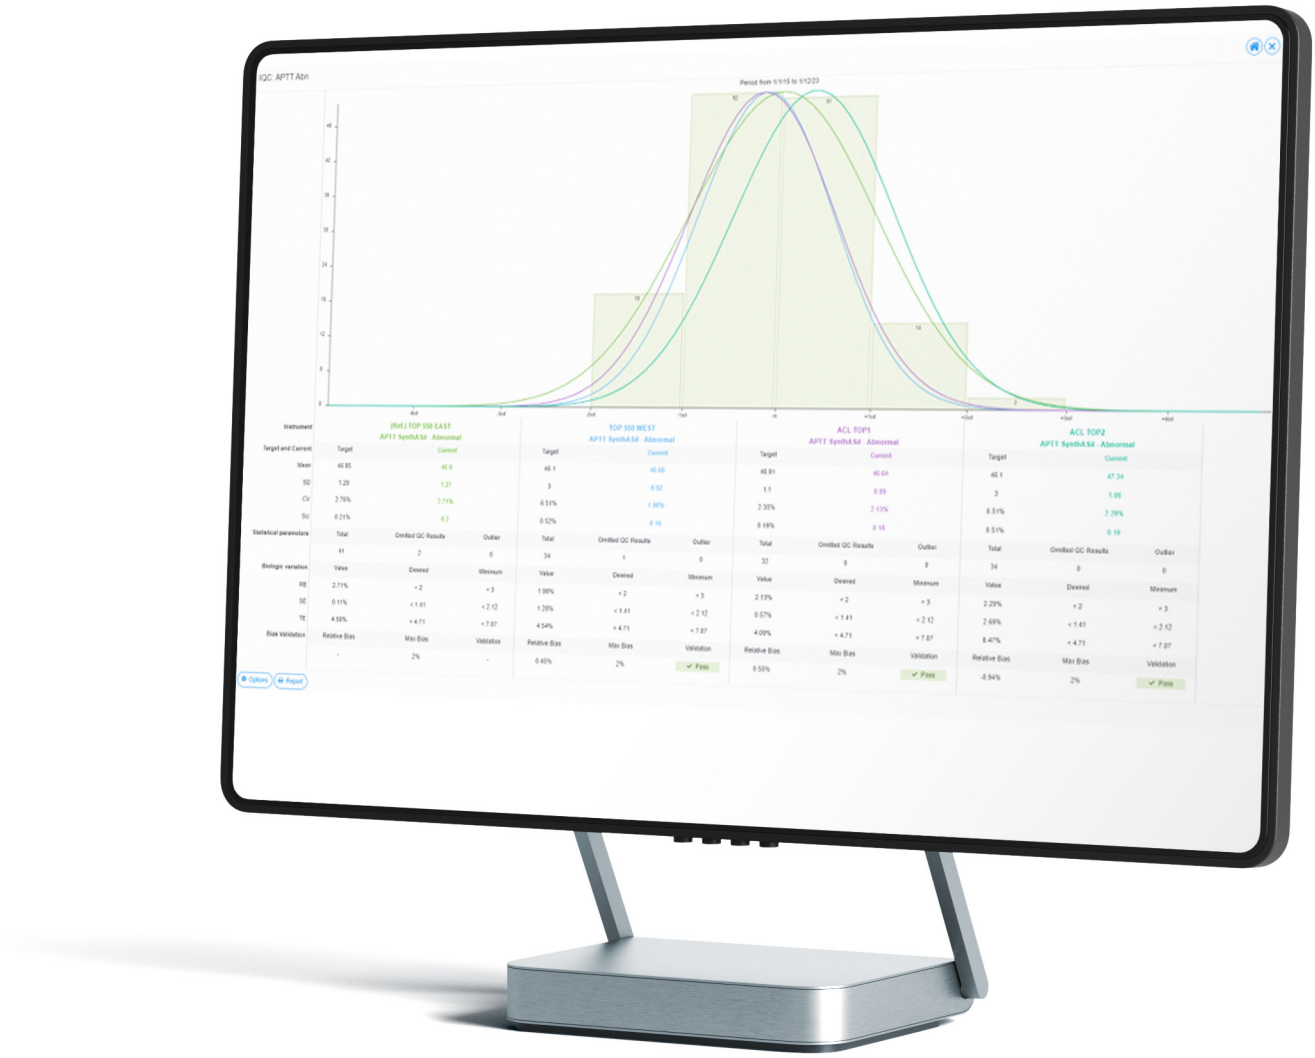

Offers a user-friendly interface with color codes, alarms, and flags

Records all actions taken on critical results

Supports security and enables encrypted communication

QC management

Manage QC simply and efficiently,
from one central location

Displays and compares QC performance across multiple systems

Compares internal QC and reports generation (e.g., Bias, Uncertainty), enabling valuation of key metrics

Provides input data for AccuTrak 2.0

Allows performance verification studies†

†Only applicable for ACL TOP® Family 70 Series systems.

Lab-decision support

Helps enable rapid lab decisions through easy access to patient result information

Reduces manual review time

Displays, saves, and compares reaction curves via Customizable Curve Library

Provides preanalytical data to support decision-making

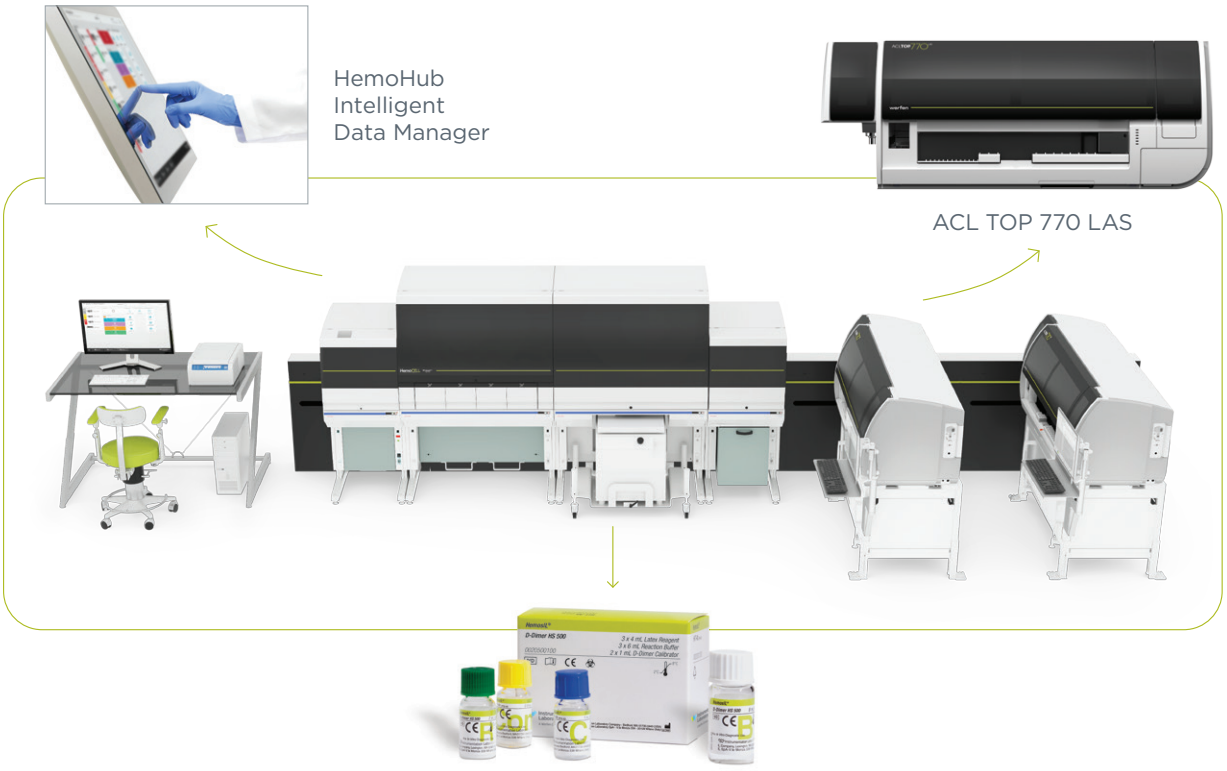

Allows rules configuration to enhance, standardize, and simplify operator workflows

Offers easy access to key performance indicators for performance monitoring

Management of HemoCell Specialized Lab Automation

Designed to address the unique needs of your laboratory

HemoCELL
SPECIALIZED
LAB AUTOMATION

HemoCell combines HemoHub, ACL TOP 770/750 LAS testing systems, and HemosIL reagents.

Centralized management through seamless integration

End-to-end automation, including automated performance verification tools

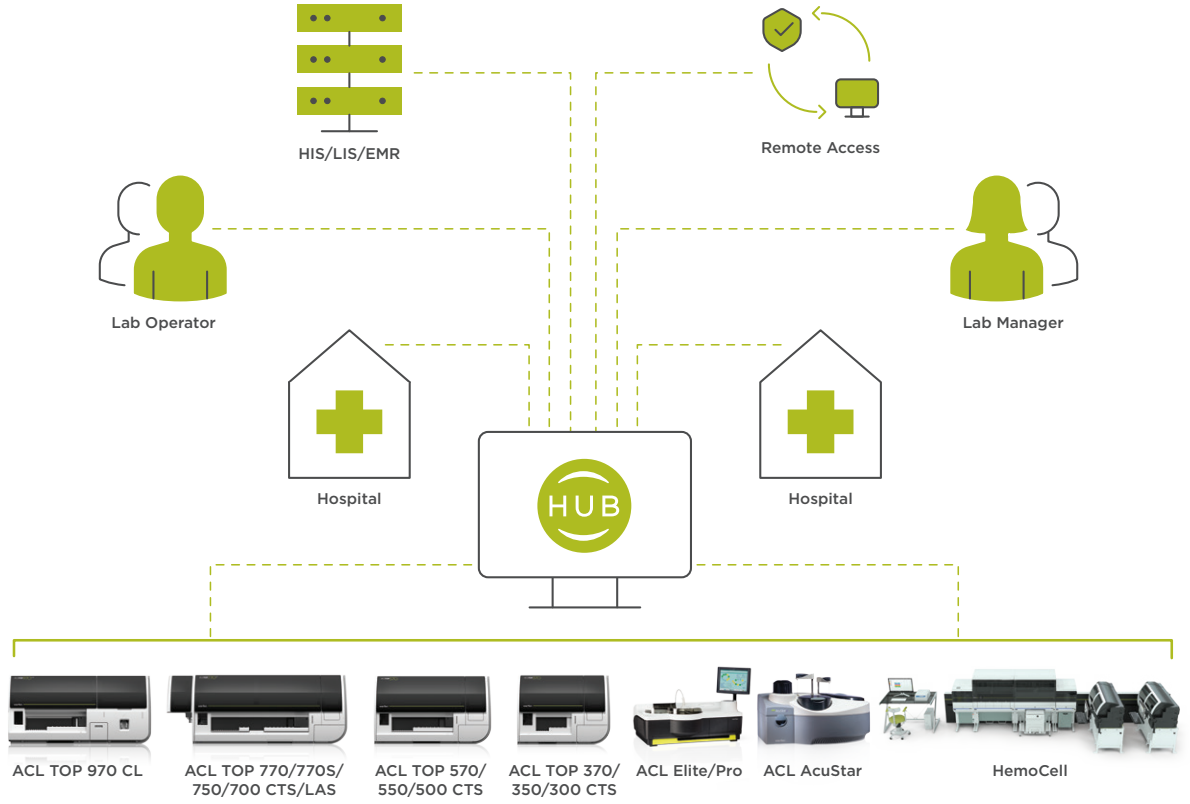

Intelligent sample routing and tracking with real-time adaptations

Customized sorting and sample banking

Enhanced performance, workflow, and lab-decision support

HEMOHUB
INTELLIGENT DATA MANAGER

Standardizes and optimizes Hemostasis testing across systems and networks—for flexibility, efficiency, and improved patient care.

HIS/LIS/EMR = hospital information system; laboratory information system; electronic medical record
